Why would you choose a Stretch Tent?

Unlike boxy marquees or run-of-the-mill conference stands, our tents can be rigged in a variety of ways to personalise their look to match your vision for production. You really can get creative and be free with lighting, dressing and branding.

Whatever the weather forecast, these tents can be rigged in a variety of ways. Either open-sided or quickly enclosed at short notice – you can rest assured that you will have a suitable plan no matter if it's hot and sunny, rainy or windy.

Our knowledgeable staff will always work with your event design team, site or safety managers to devise a suitable approach from booking to delivery. Importantly, they'll get the job done quickly and efficiently to ensure that your build and de-rig schedules run like a dream and leave you to focus on doing some business or enjoying the day.

Customizable Builds

Our stretch tents are composed of a specially-woven waterproof canopy, installed and secured using a straightforward rigging system that uses strong tent poles and fastening ropes. This ease of use also means that we don't require an army of crew, unlike other marquee hire companies or conference stand builders, allowing us to deliver a value-for-money service and guarantee an affordable solution for your needs!

They're durable and easy to install at any location whether it's indoors, rough or uneven terrain, hard-standing surfaces or in challenging green spaces. Each tent is manufactured to British Safety Standards and we can guarantee that they have all been rigorously tested in the field before going out to hire.

What's more, our tents can be rigged in a variety of configurations that are completely customizable. You can even join together multiple canopies through a modular linking system to set up various shapes and expansive installations for any sized event.
